Thank you for using this Character Sheet management tool! A lot of work has gone into making sure it functions as closely as possible to accurate Fantasy AGE rules in all cases. We hope that it will bring a new ease of use to the community and prove useful for a long time to come!

The intent of the FAGE Sheet Manager is to be used not as a replacement for official content, but as a companion to be used alongside the official content produced and published by Green Ronin. As such, only the content from the Core Rule Book (2e) has been included with this program. However, all official FAGE content should be compatible with the system.

It has been designed from the ground-up to be an open-source, easily modifiable tool, capable of accommodating homebrew and official content alike. Other AGE systems should also be usable with small modifications, if desired.

In order to accomplish this, csv files have been included to cover talents, specializations, spells, arcana, weapons, and more. By editing these files locally, you are able to add custom entries to any of these sub-systems. This can be used to, for example, add a magical Broadsword that does 1d6 extra damage, or for a DM to add an entire set of new Specializations they have written for your game – simply add them to the relevant file, and they will work exactly as written! This process is explained in greater detail in the chapter “Custom Content”.

We look forward to hearing your feedback and once again wish you the best of luck! Have a wonderful time rolling your dice, stunting your stunts, and everything else under the sun.

CHARACTER CREATION

FIRST STEPS

The first time you launch the program, you will be prompted to generate a stat-spread for your character before anything else. There are three options provided for this:

- Roll Down the Line
- Point Buy
- Standard Array

Determining Abilities

Roll Stats

Point Buy

Standard Array

Ask your DM which method they would prefer, or if you are free to use the method you prefer.

For all these methods, you are still able to manually change each stat afterwards if need be.

ROLL DOWN THE LINE

When you hit the Roll button, nine sets of 3d6 are rolled. Based on the table on page 12 of the core rule book, the results of these rolls will be mapped onto your stat-spread. If the total of your bonuses are less than 13, you may continue to re-roll until they meet or exceed it

Roll nine sets of 3d6 and apply them straight down the line to your ability scores.

Re-roll All

Resulting scores will replace your current stats when you click Apply.

Ability	3d6	Total	Score
Accuracy	5 3 4	12	+2
Communication	6 5 6	17	+3
Constitution	4 4 5	13	+2
Dexterity	2 6 6	14	+2
Fighting	5 5 5	15	+3
Intelligence	4 6 5	15	+3
Perception	4 2 5	11	+1
Strength	6 3 4	13	+2
Willpower	1 1 5	7	+0

POINT BUY

With Point Buy, you are given 13 stat-advancements that you can distribute as you wish. The maximum you may allocate into a single stat is +3, and you may choose to make a stat negative, but you gain no benefit from doing so.

Start with 0 in each stat. Spend up to 13 points to raise any stat (1 point per increase, max +3 at creation). You may take a stat below 0 but you gain no extra points for doing so.

Points spent: 0 / 13

Remaining: 13

Ability	Score
Accuracy	0
Communication	0
Constitution	0
Dexterity	0
Fighting	0
Intelligence	0
Perception	0
Strength	0
Willpower	0

STANDARD ARRAY

This method uses a standard stat advancement array consisting of two 3's, two 2's, three 1's, and two 0's to ensure a balanced starting power for the party. Assign the values as you see fit.

3	3	2	2	1	1	1	0	0	Reset
Ability	Score								
Accuracy	3	2	1	0					
Communication	3	2	1	0					
Constitution	3	2	1	0					
Dexterity	3	2	1	0					
Fighting	3	2	1	0					
Intelligence	3	2	1	0					
Perception	3	2	1	0					
Strength	3	2	1	0					
Willpower	3	2	1	0					

CHARACTER PROFILE

Once you've got your starting stats, name your character, choose (or roll) an ancestry, social class, background, and class. You may also add a profile photo if you would like! Also check your speed, and defense. Normally, Defense = 10 + Dexterity, but this can be increased by a shield or other features. Speed, similarly, is 10 + your ancestry base speed.

Also check the sidebar, and ensure your Health and Magic are the correct values for your class and ancestry choices. By default HP has been set to 15 + Constitution, though this is not accurate for any class. Follow the Core Rule Book for further guidance.

Additionally, change your Move / Charge / Run values. By default, these are equal to Speed, 0.5x Speed, and 2x Speed, respectively.

HEALTH & MAGIC HP: 25 / 28 MP: 0 / 0 ARMOUR Type: Select armour Rating: 0 Penalty: 0 MOVEMENT Move: 12 Charge: 6 Run: 24	CHARACTER PROFILE Name: John Man Ancestry: Human Social Class: Outsider Background: Hermit Class: Rogue Level: 1 Speed: 12 Defence: 12 Experience: 0 No Photo Upload Photo Max size: 5MB. Formats: JPG, PNG, GIF
---	---

You should also choose special features related to your Background and Ancestry at this point. (See Chapter: Custom Content)

TALENTS, SPECIALIZATIONS, AND SPECIAL FEATURES

Below the character profile are tables for your Talents, Specializations, and Special Features.

Both Talents and Specializations can be handled in-program, but you will have to reference the chapter “Custom Content” for your special features. At level 1, Specialization requirements can be ignored.

While creating your character, follow the CRB for your class. Using John Man the Rogue as an example, I can choose one of Contacts, Scouting, or Thievery at the Novice degree for a Talent, and can choose a Specialization (Novice) from the Rogue list. The Level-Up tab in the program gives a quick reference for what each level-up entails.

The screenshot shows two sections: 'TALENTS' and 'SPECIALIZATIONS'. Both are filtered by class 'Rogue'.

TALENTS

Name	Degree	Requirements	Effect
Contacts	Novice	Communication 1	You can attempt to make a contact out of an NPC with a successful Communication (Persuasion) test. The GM will set the target number based on the likelihood of you knowing the NPC or having mutual friends. The more distant the NPC's homeland or social class from yours, the more difficult the test will be. A contact will be friendly, but won't go out of the way to help you without additional motivation. You can't make a contact out of an NPC who already dislikes you or is an enemy.

SPECIALIZATIONS

Name	Degree	Requirements	Effect
Duelist	Novice	Accuracy 2, Dexterity 2, Proficiency In The Dueling Weapon Group, At Least The Novice Degree In One Fighting Style Talent That Applies To Accuracy-Based Melee Weapons	You favor a more sophisticated form of fighting. While using an Accuracy-based melee weapon for which you possess a Fighting Style talent, you inflict +2 damage.

Once this is finished and you have added your special features, continue onto your equipment.

EQUIPMENT

Here, you can choose your weapon groups, melee weapons, and ranged weapons. Simply enter the dropdown menu and select as needed. As a Rogue, John Man chooses Dueling and Bow weapon groups in addition to Light Blades and Staves. He also equips a rapier and a longbow.

The screenshot shows the 'EQUIPMENT' section with three main categories: Melee Weapons, Ranged Weapons, and Weapon Groups.

Melee Weapons

Weapon	Group	Damage	Actions
Rapier	Dueling	1d6 + 3	Attack Damage

Ranged Weapons

Weapon	Group	Damage	Short Range	Long Range	Actions
Longbow	Bows	1d6 + 1	26	52	Attack Damage

Weapon Groups

Light Blades X Staves X Dueling X Bows X

MAGIC, ARCANA, AND SPELLS

If your character is a magic user, this tab will be your best friend.

For a Mage, starting MP is **10 + Willpower + 1d6**. Otherwise, MP can be gained by taking the Arcane Disciple Specialization.

First, start by selecting Arcana talents from the “Known Arcana” dropdown, then, use the Spellbook dropdown to add known spells to your compendium. Clicking “View Details” will show the spell type, test, and detailed effect, while “Cast” will roll your Intelligence against the spell’s TN (along with any other bonuses).

SPELLBOOK							(4 SPELLS KNOWN)
Select Spells Known							
Icy Grip (Cold - Novice, 4 MP) × Ice Sheet (Cold - Novice, 6 MP) × Earth Passage (Earth - Novice, 6 MP) × Stone Cloak (Earth - Novice, 3 MP) ×							
Spell Name	Arcana	MP Cost	SP	TN	Casting Time	Actions	
Icy Grip	Cold - Novice	4	12	12	Major Action	View Details	Cast
Ice Sheet	Cold - Novice	6	12	13	Major Action	View Details	Cast
Earth Passage	Earth - Novice	6	12	11	Major Action	View Details	Cast
Stone Cloak	Earth - Novice	3	12	10	1 Minute	View Details	Cast

INVENTORY, FOCI AND MORE

Within the Inventory tab, you can choose your favourite stunts, keep track of your currency, and maintain a list of your items on hand.

Additionally, there are four text boxes for Personal Details, Relationships, Goals, and other notes. Write as much as you want here!

On the sidebar of the program, you will have seen all of your statistics from Accuracy to Willpower listed next to the bonus associated with that stat. In each dropdown, the available Focus options for each are shown. Certain features, along with leveling up, will provide you with foci, which provide a significant advantage to rolls using that attribute. At level 1, this is a +2, which increases to +3 at level 11, and can be further increased to +4 by “Double Focusing” (see CRB). For weapon foci, this bonus also applies to damage above level 6.

LEVELING UP

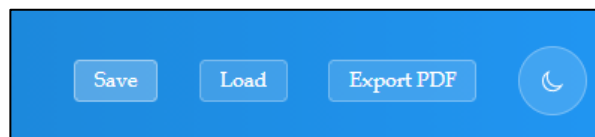

When you gain enough experience, your level will increase. With this comes advancements in HP, Foci, Abilities, Talents, Specializations, and more. The Level-up tab provides a quick reference for what you will gain when this happens, including whether Primary or Secondary stats are affected. On the sidebar, Primary stats are indicated by blue text, but these are also outlined in the core rule book.

USING THE SHEET MANAGER

SAVING, LOADING, EXPORTING

VERY IMPORTANT!

Before you close the program, make **certain** to hit the Save button in the upper right-hand corner. If you do not save, your changes will not be preserved. However, once a save has been made, the most recent save will be automatically loaded upon launch.

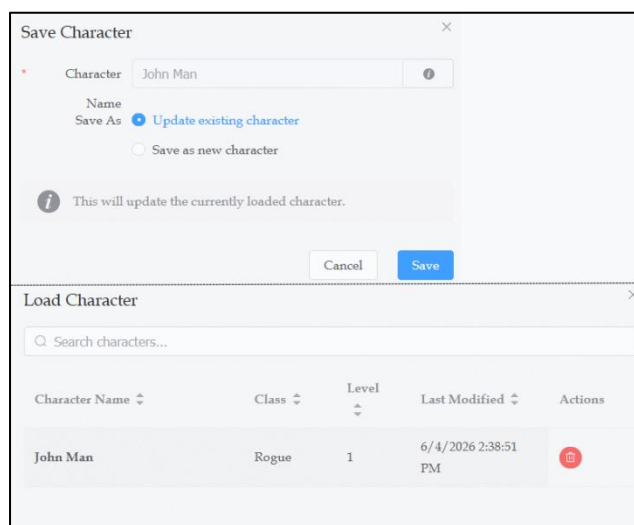

If you wish to save an additional character, a different name must be used. By choosing “Save as new character” on an existing character, the previous data will be overwritten.

The header contains two more buttons.

The first of these, “Export PDF”, will use the information entered into the program to populate the official form-fillable character sheet for FAGE 2e. If you wish to play from a physical sheet, this will provide the majority of the information needed.

The second is a toggle for either bright or night modes, depending on the preferred colour scheme.

ROLLING DICE

Within the program, there are a variety of ways to roll dice. Most of these are pretty straightforward, so only a brief explanation will be provided.

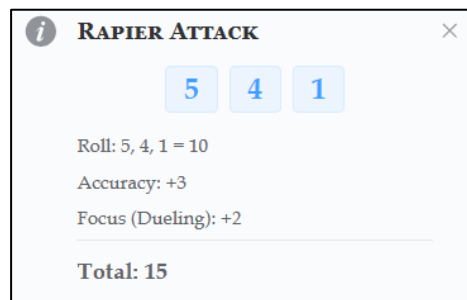

First, the arbitrary Dice Roller. Located in a collapsable pill in the bottom-left corner, you can choose the number of dice (nominally three in AGE), the number of sides per-di (almost always six in AGE), and the modifier.

Second, rolling from the sidebar. Either by clicking the “Roll” button next to a stat, or by clicking on a focus text, 3d6 will be generated with the relevant bonuses. Rolls made in this way will be added to the “History” collapsable pill.

The primary remaining methods are related to attacking and casting spells, elaborated on in the next sections.

ATTACKING

When making either a Melee or Ranged attack, it is necessary to first make an Attack roll to attempt to match your opponent’s Defense. Clicking the Attack button will roll 3d6, add your relevant attacking stat (Accuracy or Fighting), along with applicable foci, and any additional bonuses as they may appear. This dialogue box will also indicate if Stunt Points (SP) are earned by rolling doubles on any of the three dice.

If an attack lands, you will then roll damage. In this case, a Rapier was used, which deals 1d6 + 3 damage, plus Perception. A Fighting weapon would add Strength here. As a Rogue, the conditional “Pinpoint” damage is rolled as an additional 1d6, indicated in green. Below, Total Damage will show both the non-conditional damage (9), and the conditional damage (14).

Further conditional damages and bonuses are added at higher levels. For example, weapon focus is added to damage at level 6, and conditional stunt-di related damage is added at level 16.

 **RAPIER DAMAGE** 

3

5

Dice: 3 + 3 (+5 pinpoint)

Perception: +3

Total Damage: 9 (14)

CASTING SPELLS

Spellcasting is treated very similarly to attack rolls, but with the caveat that success is determined within the roll itself. A spell roll adds 3d6 to your intelligence and relevant Arcana focus, then compares the total to the TN of the spell chosen. If you meet-or-beat the TN, the spell is automatically considered a success. However, even if the casting fails, you can force a spell to succeed by pushing the spell, as outlined in the CRB. You can also earn stunt points on a spell casting.

Spell damage is not calculated directly within the program due to the high variance across spells. Either physical dice, or the arbitrary roller can be used for this purpose.

 **CAST: EARTH PASSAGE** 

3

6

1

Roll: 3, 6, 1 = 10

Intelligence: +1

TN: 11

MP Cost: 6

Total: 11 – SUCCESS

CUSTOM CONTENT

Nearly all of the content within this program can be modified and customized as you see fit.

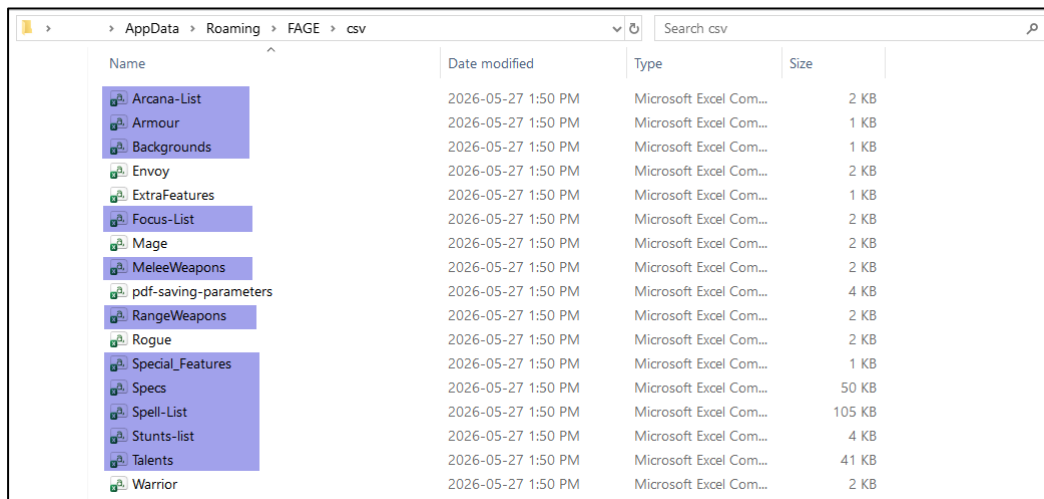

FAGE Character Generator v2.0

Open data folder

When first launching the program, a series of folders will be created in %APPDATA%\FAGE/

You can directly access this folder by scrolling to the bottom of the program and clicking “Open data folder” on any tab.

Navigate to the “csv” folder to find all of the data tables used within the sheet manager. The blue highlighted files are the ones most likely to be edited. Changing the other files may have unintended side effects.

Name	Date modified	Type	Size
Arcana-List	2026-05-27 1:50 PM	Microsoft Excel Com...	2 KB
Armour	2026-05-27 1:50 PM	Microsoft Excel Com...	1 KB
Backgrounds	2026-05-27 1:50 PM	Microsoft Excel Com...	1 KB
Envoy	2026-05-27 1:50 PM	Microsoft Excel Com...	2 KB
ExtraFeatures	2026-05-27 1:50 PM	Microsoft Excel Com...	1 KB
Focus-List	2026-05-27 1:50 PM	Microsoft Excel Com...	2 KB
Mage	2026-05-27 1:50 PM	Microsoft Excel Com...	2 KB
MeleeWeapons	2026-05-27 1:50 PM	Microsoft Excel Com...	2 KB
pdf-saving-parameters	2026-05-27 1:50 PM	Microsoft Excel Com...	4 KB
RangeWeapons	2026-05-27 1:50 PM	Microsoft Excel Com...	2 KB
Rogue	2026-05-27 1:50 PM	Microsoft Excel Com...	2 KB
Special_Features	2026-05-27 1:50 PM	Microsoft Excel Com...	1 KB
Specs	2026-05-27 1:50 PM	Microsoft Excel Com...	50 KB
Spell-List	2026-05-27 1:50 PM	Microsoft Excel Com...	105 KB
Stunts-list	2026-05-27 1:50 PM	Microsoft Excel Com...	4 KB
Talents	2026-05-27 1:50 PM	Microsoft Excel Com...	41 KB
Warrior	2026-05-27 1:50 PM	Microsoft Excel Com...	2 KB

As an example, consider the Special_Features.csv for John Man. As a Rogue, Human, Hermit, he gains the following special features.

Source	Name	Effect			
Ancestry (Human)	Ability Bonus	Intelligence +1			
Ancestry (Human)	Adaptable Focus	Gain a chosen focus			
Rogue	Pinpoint Attack	Add 1d6 damage if higher Dex			
Rogue	Rogue's Speed	Gain +2 Speed in Leather armour			
Rogue	Rogue's Armour	No penalty in Leather armour			
Background (Hermit)	Focus	Constitution (Stamina)			

By editing and saving the file, this is reflected within the sheet manager.

Source	Name	Effect
Ancestry (Human)	Ability Bonus	Intelligence +1
Ancestry (Human)	Adaptable Focus	Gain a chosen focus
Rogue	Pinpoint Attack	Add 1d6 damage if higher Dex
Rogue	Rogue's Speed	Gain +2 Speed in Leather armour
Rogue	Rogue's Armour	No penalty in Leather armour
Background (Hermit)	Focus	Constitution (Stamina)

This same method can be used to add new spells, weapons, foci, talents, specializations, armour, and so-on.

CUSTOM WEAPONS

The addition of custom weapons is moderately more complicated than the other fields, so consider if we add a magical crossbow which provides an additional 1d6 damage, a bonus 2 damage, and has doubled range. It, for some reason, also uses Communication as its damage stat. The bolded information has been added manually to the csv.

Weapon	Group	Skill	Damage	Short Range	Long Range	Reload	Dice	Mod	Special	BonusHit	BonusDamage	DamageStat
Crossbow	Bows	Accuracy	2d6 + 1	30	60	Major	2	1	1	0	0	
Magic Crossbow	Bows	Accuracy	3d6 + 3	60	120	Major	3	1	1	0	2	Communication

Each of the headers is used as follows:

- **Weapon:** Display name
- **Group:** Weapon group, determines focus used
- **Skill:** Accuracy or Fighting for the attack roll
- **Damage:** Display text, not used in the calculations
- **Short Range:** Display short range
- **Long Range:** Display long range
- **Reload:** Display reload time
- **Dice:** How many d6 to be rolled
- **Mod:** Flat added damage to the weapon (the "+1" on a normal crossbow)
- **Special:** Damage multiplier, almost always equal to 1
- **BonusHit:** Added to the attack roll, reserved for custom weapons
- **BonusDamage:** Added to the final damage total, reserved for custom weapons
- **DamageStat:** An override to using Perception/Strength. Leave blank if not desired.

MAGIC CROSSBOW DAMAGE
×

2

6

6

4

Dice: 2, 6, 6 + 3 (+4 pinpoint)
 Communication: +0

Total Damage: 17 (21)

CROSSBOW DAMAGE
×

2

5

4

Dice: 2, 5 + 1 (+4 pinpoint)
 Perception: +3

Total Damage: 11 (15)

Once the sheet has been edited and saved, and the Sheet Manager has been reloaded, the new weapon will show up in your available weapon dropdown.

Ranged Weapons					
Crossbow × Magic Crossbow ×					
Weapon	Group	Damage	Short Range	Long Range	Actions
Crossbow	Bows	2d6 + 1	30	60	Attack Damage
Magic Crossbow	Bows	3d6 + 3	60	120	Attack Damage
